

module One

Class 15

Some advance stuff

In this class we are going to see some of the advance stuff that can be used in Python lets see one by one.

But before these things you must know lambda expression.

- 1) Map
- 2) Filter
- 3) Zip

Now lets see some short tricks of writing code:-

- 1) List Comprehensions
- 2) Dictionary Comprehensions
- 3) Set Comprehensions

generators

What is Generator

Generator Function (yield)

Generator Expression

Compression in Generators

Decorators

What is Decorators

How to create a Decorators
